## **Audubon Christmas Bird Count**

Thank you for participating in the annual Haines Audubon Christmas Bird Count. It is an opportunity to enjoy a refreshing day outdoors and participate in an international effort to gather information about the abundance of birds. This is a vast scientific undertaking that sheds light on the health of the ecosystems on which the birds, and many other organisms including humans, depend. Birds can be ecological warning systems, or indicator species. It's the longest running citizen scientist survey in the world.

For more information, contact Stacie Evans <a href="mailto:stacie@takshanuk.org">stacie@takshanuk.org</a>, (907) 766-3542

Maps of the areas and reporting forms are at the Takshanuk Watershed Council, 425 Sawmill Rd, past the cemetery, (907) 766-3542. Once you have an area, let Stacie know. Please work within that area and check with counters doing the adjacent area so not to overlap.

In order to make this information as useful as possible, please enter the information below.

## Bird Check List for Audubon Christmas Bird Count, Haines AK

Below is a list of the winter resident birds found in the Chilkat Valley. The most commonly seen species are shown in **bold-faced** type. You can use this as a field checklist by making tick marks in the appropriate space for each individual of each species seen. If you see a large flock write in the number seen. The goal is to tabulate the total for each species seen during your field time. (Adapted from <u>Birds of the Chilkat Valley</u> by Dan Bertsch) [**Updated in 2023**]

Canada Goose
Trumpeter Swan
Mallard
Ring-necked Duck
